

Dear Teacher

I didn't know that there were so many rocks on the moon! Me and Bruno were feeling a bit bored on the moon and then suddenly aliens attacked us and they started eating our rocket! It's okay though because I kicked them off the rocket and Bruno barked the loudest I have ever heard before. It sounded like a wolf was on the moon with us.

I quickly repaired the rocket but the glue just needs time to dry so I won't be able to come back to school yet.

from Michael

P.S. I will really miss all the home work and the maths test on the first day.
