

KAZ Type – SEN/Dyslexia Assistive Typing Programme

Wednesday 13 November, 10-11am - This November, we're bringing to you an expert from the award-winning mainstream and neuro-diverse assistive typing programme Kaz Type. It is proven to be effective at supporting learners with special educational needs, including dyslexia.

Kaz Type breaks down the writing process, by alleviating pressure and freeing the users thoughts and memory, helping them put pen to paper. The multi-sensory approach accommodates all learning styles, enhances memory retention and recall, building confidence and self-esteem for users.

The webinar will cover: essentials on how the software works, customisation for visual disturbances, visual feedback on writing and explain how to upload problematic words or spelling lists.

The software has versions to support primary and secondary school learners, adults and a schools edition.

Book your place at tickettailor.com/events/dyslexiasparks

The session is held online via Teams and is part of our free, monthly online parent support group which often features key topics and guest speakers. For further information reach out to: rachel.madden@dyslexia-sparks.org.uk
